

Danyal Khan

MERN Stack Developer | React.js · Node.js · MongoDB | 2.5+ Yrs Experience

Karachi, Pakistan | +92 316 9367630 | mdanyalkhan2000@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

MERN Stack Developer with 2.5+ years building scalable, full-stack SaaS applications. Proficient across React.js, Node.js, Express, and MongoDB — with hands-on experience in REST API architecture, JWT/OAuth authentication, Socket.io real-time systems, and MVC design patterns. Contributed to an AI-powered enterprise SaaS platform at Xtecsoft serving global teams, and currently deploying full-stack projects to cloud environments (Vercel, Railway) with CI/CD workflows.

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Sass/SCSS, Tailwind CSS, Bootstrap, Redux, Webpack

Backend: Node.js, Express.js, REST API Development, JWT Authentication, Middleware, MVC Architecture, Socket.io, Bcrypt, CORS

Databases: MongoDB, Mongoose ODM, PostgreSQL, Prisma ORM

Testing: Jest, React Testing Library

Integrations: Microsoft Office JS API, Office 365 Add-ins, AI Agent Development

Tools & Workflow: Git, GitHub, Figma, Vercel, Firebase, Postman, VS Code, Agile/Scrum

EXPERIENCE

Xtecsoft (ioMoVo)

Feb 2024 – Feb 2026

Frontend Developer · Karachi, Pakistan · On-site

Worked on ioMoVo, an AI-powered Digital Asset Management SaaS platform used by global teams.

- Reduced enterprise file-sharing time by 60% for global teams by building 4 Microsoft 365 Add-ins (Word, Excel, PowerPoint & Outlook) using Office JS API — delivered within Agile sprint cycles
- Cut email response time by 40% for enterprise users by developing an AI-powered Outlook Agent that reads, summarizes, and drafts replies using JavaScript and Office JS API
- Improved application load time by 35% by implementing code splitting, lazy loading, and component-level optimizations — achieving stronger Core Web Vitals scores across the platform
- Built reusable, component-driven React.js architecture with TypeScript and Redux — integrated 8+ REST APIs enabling dynamic data rendering across 10+ platform modules
- Collaborated cross-functionally with backend engineers, product managers, and designers — consuming and testing Node.js/Express REST APIs, handling request/response cycles and error states on the frontend
- Eliminated 50+ production bugs through systematic debugging and maintained zero-regression releases via Agile/Scrum sprint cycles, peer code reviews, and Git branch management

Asra Soft

Oct 2023 – Jan 2024

MERN Stack Developer Intern · Karachi, Pakistan · On-site

- Strengthened full-stack development skills by contributing frontend features to the company's core product using React.js, Redux, and REST API integrations
- Built 2 full-stack practice projects independently using React.js, Node.js, Express & MongoDB — implementing MVC structure, Mongoose schemas, and JWT-protected routes
- Strengthened scalable full-stack foundations by building 2 production-style apps with JWT/OAuth-based authentication and MVC architecture — reducing onboarding time for new feature development by applying reusable component patterns

TECHNICAL PROJECTS

ProChat — *React.js, Node.js, Express.js, MongoDB, Socket.io, JWT, Bcrypt* [GitHub](#)

- Architected a full-stack real-time chat application with a Node.js/Express backend following MVC structure — implemented RESTful routes for authentication, user management, and messaging
- Designed MongoDB schemas using Mongoose ODM for Users, Messages, and Rooms — secured all routes with JWT middleware and hashed passwords using Bcrypt
- Scaled real-time messaging to support 100+ concurrent WebSocket connections by implementing Socket.io for private rooms, typing indicators, and read receipts — deployed via CI/CD pipeline to a cloud-hosted production environment
- Developed React.js frontend with Redux state management, connecting to all backend APIs and Socket.io events for a seamless real-time experience

College Management System — *React.js, Node.js, Express.js, PostgreSQL, Prisma ORM* [GitHub](#)

- Engineered a full-stack College Management System supporting 3 user roles (Admin/Teacher/Student) by building a Node.js/Express backend with PostgreSQL and Prisma ORM — implementing type-safe schema design, RBAC middleware, and RESTful APIs across 6+ entities
- Built the React.js frontend with reusable components for student, course, attendance, and result management — integrated with backend APIs for real-time data updates
- Designed RESTful API architecture with protected routes, role-based access control (Admin/Teacher/Student), and middleware-based error handling

BazaarApp — *React.js, Redux, React Router v6, Axios, REST APIs* [Live](#) · [GitHub](#)

- Built a fully responsive e-commerce web app with React 18 and Redux — integrated REST APIs via Axios for dynamic product rendering and implemented mobile-first responsive design
- Wrote component-level tests using React Testing Library and Jest — monitored Core Web Vitals for production performance on Vercel

EDUCATION

BSCS — Bachelor of Science in Computer Science

2022 – 2026

Federal Urdu University of Arts & Science, Karachi

Certification: Web & Mobile App Development — Saylani Mass IT Training Center (2023-24)
